EDUCATION

- **Tsinghua University** Sep 2017 – Jun 2021
Bachelor of Automation Engineering, Minor in Data Science Beijing, China
 - **GPA:** 3.81/4.00 (Rank 20/180 in college)
 - **Scholarship:** Tsinghua Academic Excellence Award (Awarded to top 10% students).
 - **Coursework:**
 - * Mathematics (Linear Algebra, Calculus, Probability Theory, Cryptography): All **A or A+** grade.
 - * Computer Science (Machine Learning, Computer Vision, Natural Language Processing): All **A or A-** grade.
 - * Circuits and Systems (Digital Electronics, Hardware Designing, Signal and Systems): All **A or A-** grade.
- **Tsinghua University** Sep 2021 – Jun 2024
Master of Automation Engineering Beijing, China
 - **Research Direction:** Zero-Knowledge Proof for validating the integrity of Machine Learning models, and Retrieval-Augmented Generation for Large Language Models.
 - **Published Paper:** Author of CVPR 2022 conference paper: [Back to Reality \(Code Link\)](#).

SKILLS

- **Programming skills** Sep 2019 – Now
 - **Programming Languages:** Proficient in Python, NodeJS, and Rust, with extensive experience in data analysis, web crawling, and machine learning.
 - **Strong Learning Ability:** Capable of quickly mastering new technologies, programming languages, and frameworks; write standardized code with comprehensive documentation.
 - **Development Tools:** Proficient in Git version control, Linux development environment, and skilled in using AI tools to enhance development efficiency.
 - **Algorithm Expertise:** Solid foundation in data structures and algorithms, consistently ranked in top 5% in Leetcode competitions.
- **Web3 & Crypto skills** Jan 2022 – Now
 - **Blockchain & Web3:** Familiar with blockchain fundamentals and Web3 sectors including DeFi, Layer2, Infrastructure, and ZK-related projects.
 - **Smart Contract Development:** Proficient in Solidity, Rust, Move for smart contract development, **with extensive large-scale project experience**; familiar with EVM principles and experience in modifying EVM underlying code.
 - **Zero-Knowledge Proofs:** Proficient in classic ZK-SNARK protocols, with knowledge in number theory, cryptography, and abstract algebra fundamentals.

INTERNSHIP EXPERIENCE

- **LinkedSee** Sep 2020 – Oct 2021
Data scientist - AI Operation Team Beijing, China
 - Developed machine learning models for anomaly detection in AIOps(Artificial Intelligence for IT Operations).
- **Microsoft Resaerch (MSRA)** Sep 2022 – Dec 2022
Python developer - Scientific Computing Team Beijing, China
 - Assisted in building DFT (Density-Functional Theory) algorithms for calculating protein molecular structure.

- **Obsidian Labs** Jan 2022 – Aug 2023
Smart contract developer Shenzhen, China / Remote
 - **Individually developed four versions of smart contracts** for cross-chain bridge [MesonFi](#) on various blockchains, including [Algorand](#), [Aptos](#), [Sui](#) and [Solana-Rust](#). This process **spanned over a year**.
 - **Assisted in** developing [Solidity](#) smart contract, which is already deployed on 10+ EVM chains.*Data scientist* Shenzhen, China / Remote
 - Constructed cross-chain bridges' data dashboard on Dune, [Footprint](#) and [Sentio](#) using SQL.
 - Wrote 5+ articles about blockchain research on [Mirror](#), [Medium](#) and [TechFlow](#) (Web3 forums and medias).
- **Infinity Ventures Crypto** Feb 2023 – Dec 2024
Research analyst Shanghai, China / Remote
 - Researched and evaluated seed-stage projects across various Web3 subdomains, mainly focusing on ZK-Layer2, LSD, Privacy, and Ethereum Infrastructure. Independently produced over **40+ analytical reports**.
- **Independent Smart Contract Developer** Sep 2023 – Present
Smart Contract Developer Remote
 - Independently developed multiple Web3 smart contract projects, including [EVM contracts](#) for [PumpBTC](#) (DeFi protocol valued at \$100M), [EVM contracts](#) for [We.Rich](#) (asset issuance protocol valued at \$20M), and [Solana-Rust contracts](#) for ATTPS (cross-chain communication protocol).

EXTRACURRICULAR ACTIVITIES

- **Desk4US Public Welfare Project** Mar 2020 – Sep 2020
Co-founder, Technical Team Leader Remote
 - Led a team of 100 students to help Wuhan K12 students receive online tutoring during COVID-19.
 - Matched 1k volunteers with 1k K12 students for one-on-one teaching using OR (Operation Research) algorithm.
- **WTF Academy** Jun 2022 – Sep 2022
Core programmer Remote
 - Produced 10+ sets of tests for [WTF-Solidity](#), a 8k+ star tutorial for Web3-development beginners on Github.
